*OBV does not provide fair market value of Used Vehicles in **Poor condition**

GLOSSARY

Fair Market Value: Fair market value of a used automobile is the price at which a buyer and a seller are willing to buy and sell a vehicle at a price calculated by OBV

Purpose: It defines the purpose of using the OBV tool, which means you want to sell or buy the specific vehicle. The purpose can be Buy or Sell

Party: Anyone who is on the other end of the transaction who is either buying a vehicle from you or selling it to you. Party can be of two types:

→ Individual– An individual is a standalone entity who can be a seller or buyer

→ Dealer– A dealer is a professional seller of automobiles

Category: It defines the category of the vehicle, for example - car, motorcycle, scooter or more

Make: It defines the manufacturer of the vehicle, like Maruti Suzuki, Honda, etc

Model: It defines the specific model of the vehicle, like WagonR, City, Alto, etc

Year: It defines the year of production of the vehicle, like in Maruti Suzuki Ciaz Vxi 2015; 2015 is the year of production of the vehicle

Trim: It is defined as the designation of the features and standard equipment on a vehicle, like LX, SE, EX, GT, etc. Vehicles with base trim levels have minimal equipment and entry-level prices; a step up in trim level includes more options and standard features along with a price increase

Kms Driven: This parameter defines how many kms the vehicle is driven for which you want to Calculate OBV.

Location: The value of a vehicle varies with different geographical locations. The factors that are responsible are - ex-showroom price in the area, the terrain and road surface, and more

Condition: It defines the condition of the vehicle. It can be excellent, very good, good, fair and poor. This is also a factor that determines the price of any used vehicle

Depreciation: It is the rate at which the value of the vehicle decreases year on year

Algorithm: A set of code that runs on our data science technology to calculate the fair market value of any automobile

Benchmark Price: A standard price that can be used as a reference for buying or selling an automobile

Data Science: A method to determine the accurate value using data mining, analysis, statistics and discovery

Ex-showroom Price: Cost of a vehicle without registration fees, insurance and other charges. In fact, it is the price advertised by the manufacturer

On-Road Price: Total amount a customer pays to a vehicle dealer all inclusive of ex-showroom, registration fees, insurance and other charges

New Vehicle Price Now: Total amount a customer pays to a vehicle dealer all inclusive of ex-showroom, registration fees, insurance and other charges

New Vehicle Price Then: This provides the On-Road Price of the vehicle at the time it was purchased in brand new condition

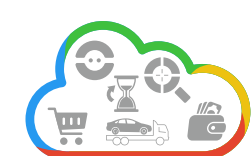

Future Value: This provides an estimated price that your used vehicle would fetch or an estimated price that you would have to pay for a similar vehicle over the next 3 years

Exchange Price: Fair Market price when the consumer wants/opts to exchange the vehicle with another vehicle

Residual Price: Estimated worth of the vehicle at the end of the lease term based on expected usage

Clunker Value: This provides an estimated scrap value of the vehicle

Total Cost of Ownership: This provides the total cost of owning this vehicle which includes the cost of running this vehicle and its maintenance cost over the next 5 years
